

Energy efficiency potential in air conditioning

Air conditioning industry

Of global electricity consumption

Alfa Laval offers multiple solutions for improving efficiency in air conditioning applications.

Our yearly new plate heat exchanger installations:

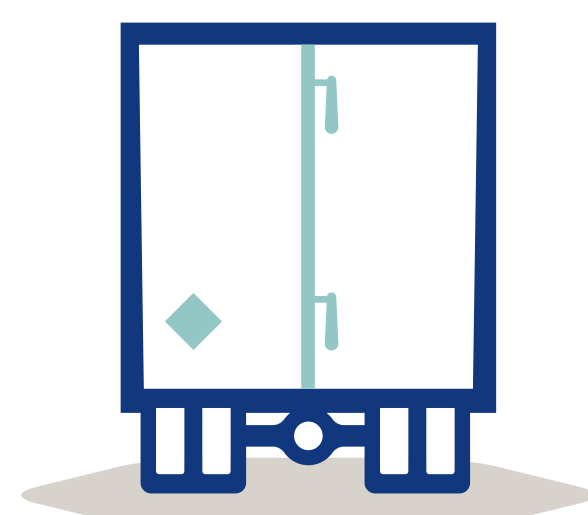

Annual electrical power savings
860 GWh

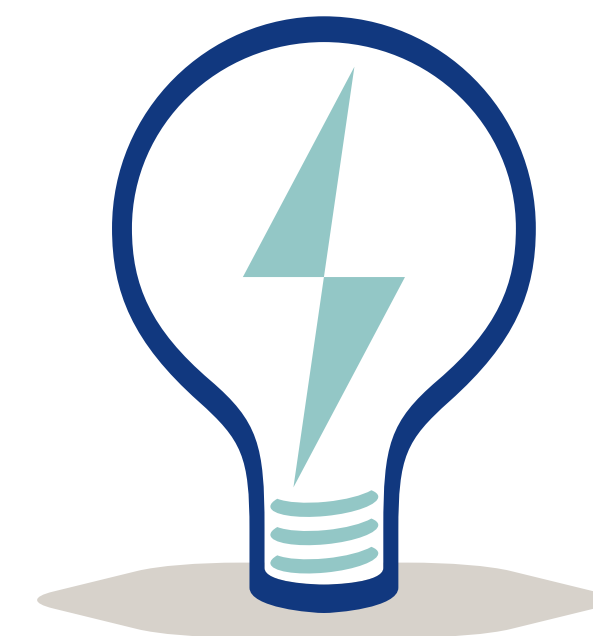

Energy demands of cooling
400,000
Singaporean homes

Annual emissions reductions
196,000
tonnes

Emissions from
2350
heavy trucks

Annual electrical power savings
7.4 TWh

Energy demands of cooling
3,400,000
Singaporean homes

Annual emissions reductions
1,700,000
tonnes

Annual emissions of
Copenhagen
Denmark
